Connected Vehicle Trade Association's

Newest Members Bring Vision, Expertise and Leadership

CVTA is proud to announce the membership of several leading firms in the connected vehicle environment.

Booz Allen Hamilton

<http://www.boozallen.com>

Booz Allen Hamilton, a global strategy and technology consulting firm, works with clients to deliver results that endure. We provide services to major international corporations and government clients around the world. Booz Allen's major areas of expertise include Strategy, Organization, Operations, Systems and Technology. With more than 16,000 employees on six continents, the firm generated annual total sales of over \$3 billion in FY2005.

OmniAir Consortium

<http://www.omniair.org>

The OmniAir Consortium, Inc. is an independent, non-profit organization founded to advance the deployment of DSRC telematics by educating stakeholders and providing third-party certification services that ensure standard compliance and enable true interoperability of DSRC applications and transactions. Based in Washington, DC, OmniAir unites facility operators, system vendors, transaction service providers and the public, and provides a forum to which all key players can contribute.

RoadRider Networks, Inc.

<http://www.roadrider.net>

The main objective of the RoadRider product suite is to deliver a comprehensive set of Telematics products which provide on-board computing and communication, content services and

network provisioning services in support of fail safe, cutting edge event notification for emergencies, vehicle roadside assistance and comprehensive secure wireless communications services management.

Road America

Tested. Proven. Trusted™

<http://www.road-america.com>

Since 1978, Road America has been providing business-to-business solutions to corporate clients throughout the US. Our longevity has allowed us to identify and sharpen our skills in the areas most important to motorists during an emergency roadside incident – speed of service, safety, accuracy, reliability, and communication. Our strengths include the flexibility to customize our service offerings and the responsiveness to meet or surpass each client's exact marketing and service needs.

Skyway Systems, Inc.

Seamless Management of Disparate Mobile Resources

<http://www.skywaysystems.com>

Skyway provides cost effective and efficient mobile platform solutions to both enterprise and government customers looking to deploy mobile data-intensive applications. By utilizing an extremely robust and flexible hosted mobile platform that seamlessly integrates numerous network protocols and supports a rich portfolio of services, eliminating expensive deployments, integration and maintenance.
