Connected Vehicle Trade Association Appoints Board

Detroit, Michigan, November 14, 2005

The Connected Vehicle Trade Association (CVTA™), an industry consortium that unites key stakeholders exploring next generation vehicle-to-vehicle and vehicle to roadside communication systems and standards, announced the appointment of its Board of Directors and the election of a Chairman and Vice Chairmen today. The Directors are:

- Harry Voccola (NAVTEQ) - Chairman
- Jack Brennan (Skyway Systems) – Vice Chairman
- Rick Noens (Motorola) – Vice Chairman
- Alan Scheik (Cisco Systems)
- Joel Hoffmann (Intel)
- Huan Yen (Delphi)
- Adam Drobot (Telcordia)
- Joyce Wenger (Booz Allen Hamilton)
- Larry Osentoski (MTS Technologies)
- Dennis Fantis (Road America)
- Don Crawford (Dykema Gossett)
- Dan Wecker (Sun Microsystems)

“The Board represents the 12 stakeholder domains that are critical for the development and implementation of a robust vehicle communications environment,” said CVTA President Scott McCormick. “We are extremely pleased to have the support and leadership of these specific individuals and their corporations.”

The immediate focus of the new Board of Directors is to define operational policies, membership capabilities and a series of core objectives that will guide the direction of the association going forward.

Policy Statement

The fundamental value that the Connected Vehicle technologies can provide is to allow all levels of users the information necessary for them to manage their activities, from the individual vehicle driver to a federal agency. We aim to provide an integrated set of solutions in an open and immediately deployable framework that allows public and private entities to participate in the solution, and implement it specifically to their needs.

About the CVTA

The Connected Vehicle Trade Association - CVTA™ (www.connectedvehicle.org) is a non-profit business league established to facilitate the interaction, and advance the interests, of the entities involved in the vehicle communication environment. The association enables the collaboration of companies, organizations, and governmental bodies engaged in developing vehicle communications. Membership is open to any corporation (except automakers), public entities, standards and specification organizations, educational institutions and qualified individuals.

For more information about the CVTA and membership benefits, call (734) 354-0546 or visit the organization's web site at www.connectedvehicle.org
